Scope and assumptions

Counting basis: one quantity per visible opening tag on the supplied ground-floor drawing. The large D1 text used inside a drawing-reference marker was excluded from the door count. W1, W2, W3, W02 and W03 were excluded because their larger text style, placement and repetition identify wall-type annotations, not window tags. W6 through W15/W8A were counted as windows; V1 through V4 are reported separately as ventilators. This is a count-only BOQ: opening sizes, materials, ironmongery, rates and amounts require the corresponding door/window schedules and specifications.
